

Worker Management Report

Generated: February 03, 2026

Total Workers: 5

Worker One (worker-01)

System Overview

- **Worker ID:** worker-01
- **Name:** Worker One
- **System Uptime:** 1 day (86,400 seconds)

Power Status

- **Battery Level:** 82%
- **Power Status:** Plugged In ✓
- **Status:** Good - Well charged and connected to power

CPU Performance

- **CPU Usage:** 18%
- **Physical Cores:** 6
- **Logical Cores:** 12
- **CPU Frequency:** 3,200 MHz
- **Status:** Low usage - System running efficiently

Memory (RAM)

- **Total RAM:** 8 GB
- **RAM Usage:** 64%
- **Available RAM:** 2.9 GB
- **Status:** Moderate usage - Adequate memory available

Storage

- **Total Disk Space:** 512 GB
- **Disk Usage:** 70%
- **Free Space:** 153 GB
- **Status:** 30% free - Consider monitoring for future cleanup

Network Activity

- **Data Sent:** 1,200 MB
- **Data Received:** 3,400 MB
- **Total Transfer:** 4,600 MB

Process Information

- **Running Processes:** 145
- **Status:** Normal process count

Overall Assessment

Worker One is performing well with low CPU usage and adequate power. RAM usage is moderate and disk space is acceptable. System is stable.

Worker Two (worker-02)

System Overview

- **Worker ID:** worker-02
- **Name:** Worker Two
- **System Uptime:** 2 days (172,800 seconds)

Power Status

- **Battery Level:** 55%
- **Power Status:** NOT Plugged In ⚠
- **Status:** ATTENTION NEEDED - Battery at moderate level, should be plugged in

CPU Performance

- **CPU Usage:** 35%
- **Physical Cores:** 8
- **Logical Cores:** 16
- **CPU Frequency:** 3,600 MHz
- **Status:** Moderate usage - Good performance capacity

Memory (RAM)

- **Total RAM:** 16 GB
- **RAM Usage:** 48%
- **Available RAM:** 8.3 GB
- **Status:** Excellent - Plenty of memory available

Storage

- **Total Disk Space:** 1,024 GB (1 TB)
- **Disk Usage:** 62%
- **Free Space:** 389 GB
- **Status:** Good - Healthy amount of free space

Network Activity

- **Data Sent:** 890 MB
- **Data Received:** 2,100 MB
- **Total Transfer:** 2,990 MB

Process Information

- **Running Processes:** 172
- **Status:** Normal process count

Overall Assessment

Worker Two has strong specifications with 16 GB RAM and good storage. However, it's running on battery at 55% and NOT plugged in.

Action Required: This worker should be connected to power to prevent battery drain.

Worker Three (worker-03)

System Overview

- **Worker ID:** worker-03
- **Name:** Worker Three
- **System Uptime:** 3 days (259,200 seconds)

Power Status

- **Battery Level:** 91%
- **Power Status:** Plugged In ✓
- **Status:** Excellent - Fully charged and connected

CPU Performance

- **CPU Usage:** 12%
- **Physical Cores:** 12
- **Logical Cores:** 24
- **CPU Frequency:** 4,200 MHz
- **Status:** Very low usage - High-performance system with plenty of headroom

Memory (RAM)

- **Total RAM:** 32 GB
- **RAM Usage:** 41%
- **Available RAM:** 18.9 GB
- **Status:** Excellent - Most powerful system with abundant memory

Storage

- **Total Disk Space:** 2,048 GB (2 TB)
- **Disk Usage:** 45%
- **Free Space:** 1,126 GB
- **Status:** Excellent - Over 1 TB free space available

Network Activity

- **Data Sent:** 540 MB

- **Data Received:** 980 MB
- **Total Transfer:** 1,520 MB

Process Information

- **Running Processes:** 133
- **Status:** Low process count for such a powerful system

Overall Assessment

Worker Three is your most powerful system with 32 GB RAM, 12 physical cores, and 2 TB storage. It's running very efficiently with only 12% CPU usage and has excellent battery status. This is your flagship machine.

Worker Four (worker-04)

System Overview

- **Worker ID:** worker-04
- **Name:** Worker Four
- **System Uptime:** 12 hours (43,200 seconds)

Power Status

- **Battery Level:** 19% ⚠️
- **Power Status:** NOT Plugged In ⚠️
- **Status:** CRITICAL - Battery critically low, immediate action required

CPU Performance

- **CPU Usage:** 67%
- **Physical Cores:** 4
- **Logical Cores:** 4
- **CPU Frequency:** 2,100 MHz
- **Status:** High usage - System under significant load

Memory (RAM)

- **Total RAM:** 4 GB
- **RAM Usage:** 88%
- **Available RAM:** 0.4 GB (400 MB)
- **Status:** CRITICAL - Very low memory available, system may be struggling

Storage

- **Total Disk Space:** 256 GB
- **Disk Usage:** 91%
- **Free Space:** 23 GB
- **Status:** CRITICAL - Disk nearly full, cleanup urgently needed

Network Activity

- **Data Sent:** 3,400 MB
- **Data Received:** 7,800 MB
- **Total Transfer:** 11,200 MB
- **Status:** Highest network activity among all workers

Process Information

- **Running Processes:** 221
- **Status:** Very high process count - May indicate performance issues

Overall Assessment

-  **CRITICAL STATUS** - Worker Four requires immediate attention:
1. **Battery at 19% and NOT plugged in** - Connect to power immediately
 2. **RAM at 88%** - Only 400 MB available, system likely experiencing slowdowns
 3. **Disk at 91%** - Urgent cleanup needed, only 23 GB free
 4. **CPU at 67%** - System under heavy load
 5. **221 running processes** - Highest among all workers

This is your weakest system with only 4 GB RAM and 256 GB storage, and it's showing signs of resource exhaustion. **Immediate Actions Required:**

- Connect to power source
- Close unnecessary applications
- Free up disk space (aim for at least 20% free)
- Review and terminate unnecessary processes

Worker Five (worker-05)

System Overview

- **Worker ID:** worker-05
- **Name:** Worker Five
- **System Uptime:** 1.5 days (129,600 seconds)

Power Status

- **Battery Level:** 63%
- **Power Status:** Plugged In ✓
- **Status:** Good - Adequate charge and connected to power

CPU Performance

- **CPU Usage:** 29%
- **Physical Cores:** 8
- **Logical Cores:** 16
- **CPU Frequency:** 3,500 MHz

- **Status:** Moderate usage - Good performance

Memory (RAM)

- **Total RAM:** 16 GB
- **RAM Usage:** 52%
- **Available RAM:** 7.6 GB
- **Status:** Good - Healthy amount of memory available

Storage

- **Total Disk Space:** 1,024 GB (1 TB)
- **Disk Usage:** 58%
- **Free Space:** 430 GB
- **Status:** Good - Plenty of free space

Network Activity

- **Data Sent:** 1,100 MB
- **Data Received:** 2,600 MB
- **Total Transfer:** 3,700 MB

Process Information

- **Running Processes:** 160
- **Status:** Normal process count

Overall Assessment

Worker Five is performing well with balanced resource usage across the board. 16 GB RAM with moderate usage, good storage availability, and connected to power. System is stable and healthy.

Fleet Summary

Power Status Overview

- ✓ **Plugged In:** 3 workers (One, Three, Five)
- ⚠ **On Battery:** 2 workers (Two, Four)
- 🔴 **Critical Battery:** 1 worker (Four - 19%)

Performance Tiers

1. **High Performance:** Worker Three (32 GB RAM, 12 cores, 2 TB storage)
2. **Mid Performance:** Workers Two & Five (16 GB RAM, 8 cores, 1 TB storage)
3. **Standard:** Worker One (8 GB RAM, 6 cores, 512 GB storage)
4. **Low Spec/Critical:** Worker Four (4 GB RAM, 4 cores, 256 GB storage)

Critical Issues Requiring Immediate Attention

1. **Worker Four:** Critical battery (19%), critical RAM usage (88%), critical disk usage (91%), NOT plugged in

2. **Worker Two:** Running on battery (55%) without power connection

Recommendations

Immediate Actions (Within 1 Hour)

- Connect Worker Four to power source immediately
- Connect Worker Two to power source
- Free up disk space on Worker Four (target: reduce to below 80%)
- Review and close unnecessary applications on Worker Four

Short-Term Actions (Within 24 Hours)

- Investigate high process count on Worker Four (221 processes)
- Monitor Worker One's disk usage (currently at 70%)
- Review network activity on Worker Four (highest traffic)

Long-Term Considerations

- Consider upgrading Worker Four's RAM (current 4 GB is insufficient for modern workloads)
- Consider expanding Worker Four's storage (256 GB is limited)
- Implement regular disk cleanup schedule for all workers
- Establish battery management policy (all workers should be plugged in during work hours)

Fleet Statistics

- **Total Workers:** 5
- **Average Battery:** 62%
- **Average CPU Usage:** 32.2%
- **Average RAM Usage:** 58.6%
- **Average Disk Usage:** 65.2%
- **Total RAM Capacity:** 76 GB across fleet
- **Total Storage Capacity:** 4.85 TB across fleet

Report End
